Retail

Retail Segment Revenue for the three months ended December 31, 2021 increased by approximately \$4.0 million or 17.2%, over the prior year period, primarily due to increased retail pricing and additional locations added at Vintage Stock, offset by decreasing sales by ApplianceSmart primarily due to decreases in sales resulting from increased competition. Retail price increases were primarily due to higher product costs relating to inflationary pressures that were passed on to customers. Cost of revenue increased proportionately with the increase in revenue. Operating income for the three months ended December 31, 2021 was approximately \$4.8 million, as compared to operating income of approximately \$4.5 million for the prior year period.

Flooring Manufacturing

Flooring Manufacturing Segment Revenue for the three months ended December 31, 2021 increased by approximately \$2.7 million, or 8.8%, over the prior year period, primarily due to greater demand for various grades of flooring, as well increases in sales prices. The shift in demand in flooring grades was generally toward higher priced product. Sales price increases were primarily due to higher product costs relating to inflationary pressures that were passed on to customers. Cost of revenue for the three months ended December 31, 2021 increased proportionately with revenue, as compared to the prior year period. Operating income for the three months ended December 31, 2021 was approximately \$4.6 million, as compared to operating income of approximately \$4.2 million for the prior year period.

Steel Manufacturing

Steel Manufacturing Segment Revenue for the three months ended December 31, 2021 increased by \$2.6 million, or 27%, as compared to the prior year period, primarily due to increased sales prices resulting from rising costs. Cost of revenue for the three months ended December 31, 2021 decreased as a percentage of sales due to improved manufacturing efficiencies and increased revenue due to price increases, over the prior year period. Operating income for the three months ended December 31, 2021 was approximately \$1.7 million, as compared to operating income of

approximately \$0.1 million in the prior year period. The increase in operating income is primarily due to an increase in gross profit.

Corporate and Other

The increase in Corporate and Other Revenue is primarily attributable to the consolidation of Salomon Whitney in June 2021. Operating loss for the three months ended December 31, 2021 decreased by approximately \$0.8 million as compared to the prior year period.

Non-GAAP Financial Information

Adjusted EBITDA

We evaluate the performance of our operations based on financial measures such as revenue and “Adjusted EBITDA.” Adjusted EBITDA is defined as net income (loss) before interest expense, interest income, income taxes, depreciation, amortization, stock-based compensation, and other non-cash or nonrecurring charges. We believe that Adjusted EBITDA is an important indicator of the operational strength and performance of the business, including the business’ ability to fund acquisitions and other capital expenditures, and to service its debt. Additionally, this measure is used by management to evaluate operating results and perform analytical comparisons and identify strategies to improve performance. Adjusted EBITDA is also a measure that is customarily used by financial analysts to evaluate a company’s financial performance, subject to certain adjustments. Adjusted EBITDA does not represent cash flows from operations, as defined by generally accepted accounting principles (“GAAP”), and should not be construed as an alternative to net income or loss and is indicative neither of our results of operations, nor of cash flows available to fund all of our cash needs. It is, however, a measurement that the Company believes is useful to investors in analyzing its operating performance. Accordingly, Adjusted EBITDA should be considered in addition to, but not as a substitute for, net income, cash flow provided by operating activities, and other measures of financial performance prepared in accordance with GAAP. Adjusted EBITDA is a non-GAAP financial measure. As companies often define non-GAAP financial measures differently, Adjusted EBITDA, as calculated by Live Ventures, Incorporated, should not be compared to any similarly titled measures reported by other companies.
